

SEWP Overview

NASA's Solutions for Enterprise-Wide Procurement VI (SEWP VI) provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors.

Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers. The SEWP vehicle represents acquisition innovation within the Federal Government.

The program is self-funded through usage fees (0.34%) and provides all Federal agencies with acquisition support — more than 50,000 orders per year.

Fair Opportunity

FAR 16.505(b)(1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding \$10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the Contracting Officer (CO) and that the CO must document the rationale for placement and price of each order.

Using the SEWP online Quote Request Tool (QRT) is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP QRT will automatically include Contract Holders within a selected group or based on a suggested source.

About Biswas Information Technology Solutions Inc. (BITS)

Biswas Information Technology Solutions Inc. (BITS) is a Woman-Owned Small Business (WOSB) headquartered in Herndon, Virginia, holding CMMI and ISO certifications. BITS delivers advanced IT solutions and professional services to Federal agencies including the VA, FDA, GSA, EEOC, and OPM, specializing in cloud infrastructure, AI/ML operations, application modernization, cybersecurity, and digital transformation.

As a NASA SEWP VI Contract Holder, BITS gives agencies a trusted, agile technology partner with deep Federal delivery experience and a demonstrated record of deploying secure, compliant solutions across civilian and defense environments.

What is in Scope for SEWP VI?

SEWP is designed to provide a broad suite of Information Technology, Communication and Audio-Visual (ITC/AV) solutions and services. Technology is ever-evolving and for that reason SEWP's processes enable Contract Holders to add new commercial technology and IT services to their contract daily, as requested by customers. The focus of SEWP is on the full suite of technology offerings that simplify Government access across the entire ITC/AV solutions and services landscape.

SEWP is composed of three (3) scope categories. If you would like SEWP to determine whether your requirement is within scope, send an overview and/or bill of materials (BOM) to help@sewp.nasa.gov. The three categories are:

- **Category A** — ITC/AV Solutions
- **Category B** — Enterprise-Wide ITC/AV Service Solutions
- **Category C** — Mission-Based ITC/AV Service Solutions

Ordering Process

The internal ordering process of each agency varies. The process and accompanying forms for Purchase Requests (PR) and Delivery Orders (DO) issued against a SEWP contract are defined by the issuing agency, not by the NASA SEWP Program Management Office (PMO).

The typical process is for an end-user to determine a requirement and generate a PR. The PR along with any necessary funding information is sent to that agency's procurement office, which results in the issuance of a DO. Any valid Federal Agency DO form and associated DO number may be used. The NASA SEWP PMO does **not** issue DOs — these must be issued through the issuing agency's procurement office. The SEWP PMO reviews, processes, and tracks issued DOs and forwards them to the Contract Holder(s).

Some agencies have special requirements for issuing IT Delivery Orders. It is the Issuing Agency's Contracting Officer's responsibility to be aware of any agency-specific policies regarding issuing orders via an existing contract vehicle and Government-Wide Acquisition Contracts. There are no requirements under SEWP Contracts for issuing agencies to use other intermediary procurement offices, except as directed through their own internal policies.

If modifications are made to any order, these modifications must also route through the SEWP PMO.
